

Yahya Khamayseh

Senior AI Engineer · Full-Stack

Dubai, UAE · yahya.s.m.khamayseh@gmail.com · github.com/yahya-khamaisi · linkedin.com/in/yahya-khamaisi · yahya-khamaisi.github.io

SUMMARY

Full-stack engineer who builds AI systems for production — agents, retrieval, APIs, and the cloud they run on. Currently Senior AI Engineer at Takaful Emarat, owning an insurance AI portfolio on Azure. Six years of enterprise delivery across the UAE, Singapore, and Malaysia, backed by part-time doctoral research in applied AI. Service boundaries are drawn clearly, inputs are validated aggressively, and AI features are made measurable rather than magical.

EXPERIENCE

Senior AI Engineer — Takaful Emarat

Apr 2026 – Present

Dubai, UAE

- Owns continuous delivery of the company AI and automation portfolio on Azure.
- TE AI Portal — Individual Underwriting, Group Underwriting, and Policy Renewal — building and operating agents on Azure AI Foundry.
- Reimbursement Claims Portal end to end: FastAPI backend and Next.js frontend for member submission, finance/operations review, and reporting.
- OCR platform for B2B and B2C document journeys — classification and structured extraction on Azure Document Intelligence.
- Proposes and delivers new AI-agent automations for underwriting, claims, and other departments, from requirements through Azure deployment and handover.

Senior AI / Cloud / Backend Engineer — Trinity Wizards

Jan 2024 – Mar 2026

Malaysia (Hybrid) · AWS Platinum Partner

- Client delivery for Malaysia Airlines' travel and voucher platforms.
- MHVoucher: Node.js / Azure Functions APIs for inventory, redemption, gifting, and campaigns, plus a NestJS admin portal with RBAC and audit logging; SQL tuning and redemption-failure notifications.
- Journify: Azure Functions middleware and queue-driven processing for planner, itinerary, and destination content (230+ commits); Laravel CMS enhancements and Magento 2 continuity fixes.

Senior AI Engineer — CoolRIOTS

Aug 2022 – Jan 2024

Singapore (Hybrid) · IBM Platinum Partner

- Built RAG and retrieval platforms on Python, FastAPI, LangChain, OpenAI, and Milvus / ChromaDB, backed by IBM Object Storage.
- Led the BeXInsight multi-tenant global search API (Elasticsearch, Redis, MongoDB) — roughly 60% lower query latency through indexing and query-plan tuning.
- Integrated the Singapore MyInfo identity API with multi-layer authentication and consistent cross-service data exchange.
- Built analytics and aggregation services improving dashboard responsiveness and reporting performance.

Full-Stack Engineer — Wavelet Solutions

Sep 2021 – Aug 2022

Malaysia (On-site)

- Delivered React and Vue features for real-time communication surfaces.
- Built 50+ REST APIs in Node.js / Express with Telegram, WhatsApp/Twilio, and Facebook integrations.
- Designed PostgreSQL schemas and automated Azure CI/CD while holding ~90% test coverage.

Backend Engineer — Karisma System M

Jul 2020 – Aug 2021

Malaysia (On-site)

- Built 30+ microservice APIs for CRUD, file processing, and real-time streaming.
- Improved image-processing performance ~40% through backend optimisation.
- Troubleshoot production issues with a strong emphasis on security and reliability.

SELECTED PROJECTS

Architecture diagrams and full write-ups at yahya-khamaisi.github.io

TE AI Portal (Takaful Emarat). Multi-project AI workspace for underwriting and policy renewal, backed by five hosted Azure AI Foundry agents; Next.js 15, Prisma, Azure SQL.

CoolRIOTS RAG Platforms. Retrieval and chatbot backends on FastAPI, LangChain, Milvus/ChromaDB, and OpenAI, with secure MyInfo identity integration.

BeXInsight Global Search (CoolRIOTS). Multi-tenant search API with strict tenant isolation; ~60% lower query latency through indexing and query-plan tuning.

MHVoucher Platform (Malaysia Airlines). Production voucher platform for inventory, redemption, gifting, and campaigns with a NestJS admin portal.

Journify Middleware (Malaysia Airlines). Azure Functions backbone for a travel content platform — 230+ commits, event-driven queues, Node.js 20 / Functions v4.

Factory6G (doctoral research). Docker-first platform for testing AI-assisted scheduling and reliability under simulated load; Python, TensorFlow, Sionna. Secondary to the engineering work.

EDUCATION

PhD in Computing, Applied AI — Sunway University

Jan 2024 – Present

Part-time, alongside full-time engineering · Selangor, Malaysia. Applied AI & ML for reliability and scheduling under strict latency budgets (Factory6G).

MSc Computer Science — UNIMY

2021 – 2022

Malaysia. GPA 3.68/4.0, ranked 1st in department.

BSc Computer Engineering — An-Najah National University

2016 – 2020

Nablus, Palestine. GPA 3.83/4.0, ranked 1st in department.

PUBLICATIONS

- CCTV armed robbery detection with YOLOv8. AIP Conference Proceedings, 2025.
- URLLC for 6G Enabled Industry 5.0: A Taxonomy of Architectures, Cross-Layer Techniques, and Time-Critical Applications. arXiv:2510.08080, 2025.
- Review and Enhancement of VoIP Security: Identifying Vulnerabilities and Proposing Integrated Solutions. Journal of Telecommunications and the Digital Economy, 2024.
- Ethics and its role in the future of AI development. Int'l Conference on Frontier of Digital Transformation, 2023.

SKILLS

Backend & APIs: Python (FastAPI, Flask), Node.js (Express, NestJS), Azure Functions, REST, microservices, webhooks.

AI & Retrieval: Agentic AI / RAG, LangChain, OpenAI, Azure AI Foundry, Milvus / ChromaDB / Elasticsearch, prompt engineering & evaluation.

Data & Cloud: PostgreSQL, MongoDB, Redis, Azure Container Apps / APIM / Queues, Docker, CI/CD, schema design & query tuning.

Full Stack & Product: React, Next.js, TypeScript, admin portals & embeddable widgets, RBAC / SSO / audit patterns, API design & integration.

Research toolkit (secondary): Python simulation pipelines, TensorFlow / Sionna, YOLOv8 / computer vision, Monte Carlo experiment automation.
